

Proceedings of the International Workshop
"Ecohydrology as a Tool For Restoration of Physically Degraded Fish Habitats"
in the framework of European Inland Fishery Advisory Commission (EIFAC) and UNESCO IHP-V Project
2.3/2.4 on Ecohydrology,
Warsaw, Poland, 11-13 June 2001

Contents

Preface – Ecohydrology Concept (UNESCO IHP V 2.3/2.4) as the river basin scale – low costs high technology for sustainable use of fisheries resources <i>Maciej Zalewski</i>	273
1. The European Inland Fisheries Advisory Commission - past, present and future <i>Heiner Naeve</i>	275
2. From land/water ecotones to the concept of ecohydrology <i>Frederic Fournier</i>	277
3. Restoration of sustainability of physically degraded fish habitats – The Model of Intermediate Restoration. <i>Maciej Zalewski, Robin Welcomme</i>	279
4. Ecological models are useful tools in Ecohydrology <i>Sven Eric Jørgensen</i>	283
5. Impacts of man's modifications of river hydrology on the migration of freshwater fishes: a mechanistic perspective <i>Etiene Baras, Martyn C. Lucas</i>	291
6. Stream habitat or water quality - what influences stronger fish and macrozoobenthos biodiversity ? <i>Zdeněk Adámek, Pavel Jurajda</i>	305
7. Some considerations of the effects of differences in flood patterns on fish populations <i>Robin Welcomme, Ashley Halls</i>	313
8. A dynamic pool model for floodplain-river fisheries <i>Ashley Stewart Halls, Geoffrey Peter Kirkwood, Antony Ian Payne</i>	323
9. Effects of alterations in fresh water supply on the abundance and distribution of <i>Engraulis encrasicolus</i> in the Guadiana estuary and adjacent coastal areas of south Portugal <i>Luis Chicharo, Maria Alexandra Chicharo, Eduardo Esteves, Pedro Andrade and Pedro Morais</i>	341
10. Importance of lentic waterbodies as fish nurseries in flood plain of the Dyje River, Czech Republic <i>Šárka Bartošová, Pavel Jurajda, Markéta, Ondračková, Martin Reichard</i>	347
11. Influence of LWD removal on fish community in small rivers <i>Małgorzata Lapinska, Piotr Frankiewicz</i>	355
12. The technology for reduction of fishes suffocation during winter period on example of Dnipper reservoirs <i>Vladimir Timchenko</i>	373
13. Return of salmon back to Polish waters <i>Ryszard Bartel</i>	377
14. Hydroacoustics as a tool for studying the impact of habitat modification (degradation) upon fish: a review. <i>Małgorzata Godlewska, Maciej Zalewski</i>	393
15. Hydrological Importance of Carp Ponds in the Upper Vistula River Catchment Basin <i>Danuta Augustyn</i>	401
