

Contents

1. Ecohydrology - integrative science for sustainable water, environment and society <i>Maciej Zalewski</i>	3
I. Challenges and perspectives for the development of Ecohydrology	
2. Ecohydrology – a perspective from the Man and the Biosphere Programme <i>Peter Bridgewater</i>	13
3. Monitoring and assessing global water quality - the GEMS/Water experience <i>Richard D. Robarts, Andrew S. Fraser, Kelly M. Hodgson, Guy M. Paquette</i>	19
4. Hydrological processes in a catchment scale under climate change <i>Zdzisław Kaczmarek</i>	29
5. Phytotechnologies and ecohydrology: A comprehensive approach to watershed management <i>Vicente Santiago-Fandino, John Neate</i>	39
6. Ecohydrology for sustainable development and management of water resources <i>Zbigniew W. Kundzewicz</i>	49
II. Regional strategies for the development and implementation of ecohydrological approach	
7. The eco-hydrological feedbacks as constraints on the development of drylands. <i>Joel Robert Gat</i>	61
8. Applying Ecohydrology to on-going management of wetlands and floodplains - "Learning by doing" <i>Anne Jensen</i>	67
9. Application of ecohydrology in the Brahmaputra River <i>Sanchita Boruah, Shyama Prasad Biswas</i>	79
10. Ecohydrology, a low cost - high technology opportunity for Asian countries <i>Peter E. Hehanussa</i>	89
11. Instilling comprehensive management and technological approaches for the sustainable management of La Plata River Basin water resources <i>Alberto T. Calcagno</i>	93
12. The use of eco-engineering in a watershed management program in southern Patagonia <i>J.Marcelo Gaviño Novillo</i>	105
13. Ecohydrology in South America and the Caribbean: A summary of research and coordination activities (1996 - 2001) <i>Luis Rodríguez Fiallos</i>	113

14. Establishing Ecohydrology in the Real World: The Lobau Biosphere Reserve and the integrated water scheme in Vienna <i>Georg Albert Janauer</i>	119
15. Hydro-ecological revitalisation of the Gemenc floodplain in Hungary <i>István János Zsuffa, Beáta Pataki, Géza Jolánkai</i>	127
16. Use of an ecohydrology model to predict the impact on the Serengeti ecosystem of deforestation, irrigation and the proposed Amala Weir Water Diversion Project in Kenya. <i>Emmanuel Gereta, Eric Wolanski, Markus Borner, Suzanne Serneels</i>	135
17. Ireland's changing freshwater habitats: anthropogenic impacts, fishery management problems and ecohydrological perspectives. <i>T.Kieran McCarthy, Paula Cullen</i>	143
18. Phosphorus in a lowland calcareous river basin: a multiscale approach to understanding human impacts <i>Benoît O.L. Demars, David M. Harper</i>	149
19. Nutrient input and retention in shallow lakes affected by annual variation in weather conditions: studies from a river–lake cascade in the Masurian Lakeland (Poland). <i>Anna Hillbricht-Ilkowska</i>	165

III. Development of the different methodological approaches

20. Integrated river basin management: a new ecologically-based modelling approach <i>Michael Rode, Bernd Klauer, Peter Krause, Karl-Erich Lindenschmidt</i>	177
21. Use of a historical situation as a reference for the optimal groundwater situation in Dutch nature conservation areas <i>Van Ek, Remco, Frans Klijn, Han Runhaar, Roelof Stuurman, Ad Mol</i>	187
22. Towards a simple integrated model for the re-wetting of nature reserves <i>Petra J.G.J. Hellegers, Jan-Philip M. Witte</i>	199
23. Effects of climate and land use change on hydrological conditions and species composition in Dutch riverine grasslands (Calthion, Junco-Molinion) <i>Han J. Runhaar, Paul P.E.V. van Walsum, Diana A.H. Prins</i>	219
24. The strategy of preventing the continual decline of ground water level in UNESCO MAB Biosphere Reserve “Puszcza Kampinowska” by restoration of Vistula flood pulses. <i>Anna Andrzejewska, Maciej Zalewski</i>	227
25. Regional Sediment Management: A review of contemporary practice <i>Kevin S. Skinner</i>	233
26. The Use of Baseflow Turbidity to Assess Catchment Condition. <i>Trevor Rodney Ferdinands, Frank Robert Burden</i>	241
27. Towards New Ecological Drainage System in Malaysia <i>Ismail Abustan, Nabsiah Abdul Wahid</i>	249
28. Ecosystem condition and water quality control at impounded sections of rivers by the regulated hydrological regime <i>Vladimir Timchenko, Olga Oksiyuk</i>	259
29. Directions and timing of the material fluxes on the floodplain (case study of Vistula river valley near Plock, Poland)	

<i>Artur Magnuszewski</i>	265
30. A deeper understanding of river habitat-scale ecohydraulics: interpreting the relationship between habitat type, depth and velocity using knowledge of sediment dynamics and macrophyte growth <i>Joanna L. Kemp, David M. Harper, Giuseppe A. Crosa</i>	271
31. Influence of vegetation on the hydraulic behaviour of a reconstructed wetland <i>Luigi Dal Cin, Giuseppe Bendoricchio</i>	283
32. Phytoremediation of heavy metals: the role of macrophytes in a stormwater basin <i>Anne-Christine Gouder de Beauregard, Grégory Mahy</i>	289
33. Estimation of denitrification rate in diversified bottom sediments of the Sulejow Reservoir <i>Agnieszka Bednarek, Maciej Zalewski, Mieczysław Błaszczak, Ewa Czerwieniec, Janusz Tomaszek</i>	297
34. Artificial reefs and their effects on fish assemblages in a Brazilian Reservoir and Tailrace <i>Carlos E. C. Freitas, Miguel Petrere Jr., Maria A. P. Abuabara</i>	305
35. The impact of soil mulching on the intensity and occurrence of droughts in wheat crops of the former Soviet Union <i>Nadezhda Shumova</i>	315

What did we learn in the first phase of the Project?

36. How much do we know about planning ecohydrological management actions? <i>Géza Jolánkai, István Bíró</i>	321
